Art Unit: 1745

#### **DETAILED ACTION**

#### Election/Restrictions

- 1. Applicant's election of Species A, Formula 3, specifically a dimethyl malonate and the inorganic solvent comprising a mixture of diglyme, dimethoxyethane and 1,3-dioxolane in the reply filed on 9-15-06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. Applicants had elected the solvent to comprise dimethyl malonate and a mixture of diglyme, dimethoxyethane and 1,3-dioxolane. This has been found allowable. In addition the solvent comprising dimethyl malonate and a) diglyme or b) dimethoxyethane or c) 1,3-dioxolane which was cited in claims 7-8 in which each was dependent on claim 6 which was dependent on claim 1 has also been found allowable. These claims were found allowable because the combination was not found.
- 3. The claims have been amended therefore it has been found that an electrolytic solution comprising formula (3) and the organic solvents listed in claim 1 have also been found allowable.
- 4. The new species searched was an electrolytic solution comprising formula (1) (an acetate) and diglyme (diethyleneglycol dimethylether) or triglyme (triethyleneglycol dimethylether).

Application/Control Number: 10/669,464

Art Unit: 1745

5. Claims 8 and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 9-15-06.

### Response to Arguments

Applicant's arguments and amendment to the claims have been considered but are moot in view of the new ground(s) of rejection. The rejection of claims 1, 3, 5-6, 9-11, 13, 15, 17-18, 21-22 under 35 U.S.C. 102(b) as being anticipated by JP 54-75534, (abstract) or JP 54-75535 (abstract) has been withdrawn. The rejection of claims 1-3, 5-6, 9-15, 17-18, 21-22 under 35 U.S.C. 102(b) as being anticipated by Matsui et al. (JP 08-096849, abstract and translation) has been withdrawn. The rejection of claims 1-3, 5-6, 9-15, 17-18, 21-22 under 35 U.S.C. 102(b) as being anticipated by Shiga et al. (JP 2000-223153, abstract and translation) has been withdrawn. The rejection of claims 1, 3, 5-6, 9-13, 15, 17-18, 21-22 under 35 U.S.C. 102(b) as being anticipated by Lee-Doo et al. (JP 11-135148, abstract and translation) has been withdrawn. The rejection of claims 1-3, 5-6, 9-15, 17-18, 21-22 under 35 U.S.C. 102(a) as being anticipated by Shizuka et al. (JP 2002-367673, abstract and translation) has been withdrawn.

Application/Control Number: 10/669;464

Art Unit: 1745

## Claim Rejections - 35 USC § 112

7. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 is rejected because the claim depends from claim 6 which has been cancelled. This makes the claim vague and indefinite.

# Claim Rejections - 35 USC § 103

8. Claims 1, 3-4, 7, 10-13, 15-16, 19, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi et al. (5,580,683).

Takeuchi et al. teaches an electrochemical cell comprising an alkali metalaluminum alloy anode, a mixed metal oxide cathode and a nonaqueous electrolytic
solution. Takeuchi et al. teaches in column 8, line 56 to column 9, line 9, that the
nonaqueous solvents suitable for the present invention are chosen so as to exhibit
those physical properties necessary for ionic transport (low viscosity, low surface
tension and wettability). Suitable sol vents may be any one or more of the organic
solvents which are substantially inert to the anode and cathode electrode materials such
methyl acetate (CH3-O-C=O-CH3, dimethyl acetate), diglyme, triglyme, 1, 2dimethoxyethane, etc. Takeuchi et al. teaches in column 10, Example I, that 1 M
LiAsF6 was present. Takeuchi et al. teaches in column 8, lines 29-55, that the
separator provides separation to the anode and cathode. Takeuchi et al. teaches in

Application/Control Number: 10/669,464 Page 5

Art Unit: 1745

column 5, lines 28-67, that the cathode comprises a metal oxide, a metal sulfide, a mixed metal oxide, etc. and teaches in lines 1-26, that the anode comprises a thin metal sheet or foil of the anode metal such as lithium.

Takeuchi et al. teaches the claimed invention as explained above but does not specifically teach that methyl acetate (CH3-O-C=O-CH3, dimethyl acetate) and diglyme or triglyme is present in the solvent. Takeuchi et al. teaches that any one or more of the organic solvents which are substantially inert to the anode and cathode electrode materials can be used.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use both solvents dimethyl acetate and diglyme or triglyme in the electrolyte solvent taught by Takeuchi et al. because it is prima facie obvious to combine two compositions each of which is taught by prior art to be useful for the same purpose in order to form a third composition that is to be used for the very same purpose. See *In re Kerkhoven, 205 USPQ 1069; In re Susi, 169 USPQ 423.* 

## Allowable Subject Matter

9. Claims 2, 5, 14, 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
